GreenFix Technology

GreenFix Golf has designed a new, simple to use, short tong tool with a patented "stopper" to prevent excessive root damage and allow for much faster healing. The scientifically developed, university tested GreenFix ball mark repair tools work on the green's surface, staying out of the roots to promote remarkably faster healing and smoother putting surfaces.

(PPT) Pull Technology

Ball Markers are securely enclosed within the outer perimeter opening in the divot tool and held in place by a magnet concealed within the divot tool walls. Ball Marker is removed by "Pulling" the ball marker up thru the opening in the top of the Divot Tool. Like all PPT Designs "Pull" Technology features a clear and unobstructed view of both sides of the ball marker.
