Double-Sided Ballmarker

Dimensions • 90mm x 28mm

Weight • 32 grams

Ball Marker • 25mm (1 inch) Round Ball Marker – 2 sided logo – 4 colors

Push Pull (PPT) Technology

Push-Pull Technology (PPT) is a quantum leap forward in divot tool design. Available in two designs. A "Push" design that uses either a 360-degree "Ring" magnet or a "Pull" design where the ball marker is securely enclosed within the outer perimeter opening in the divot tool and held in place by a magnet concealed within the divot tool walls. The ball markers are removed by "Pulling" the ball marker up thru the opening in the top of the Divot Tool.

Push

Pull
